

How long will my treatment last?

When your smile is designed using advanced technology and design software with KLOWen Custom Braces, you'll enjoy a faster treatment time by 31% (compared to non-custom braces). Fewer visits to our office, same great results.

How often do I need to come for adjustments?

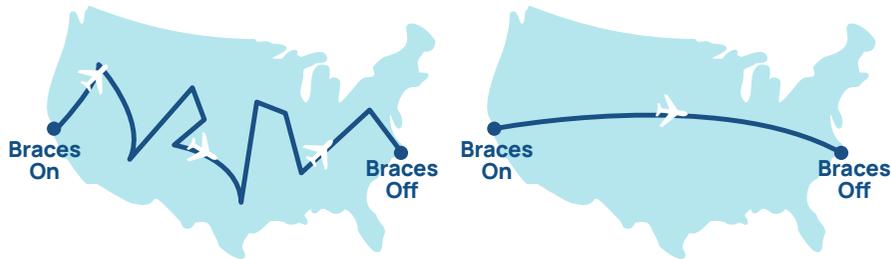

Designing your smile before you get your braces means we know your treatment plan is right from the start. As a result, we can eliminate multiple bracket repositioning and wire bending appointments. While every patient is different, you can expect a significant reduction of visits, typically required for adjustments.

What does custom mean for me?

KLOWen Custom Braces are engineered to match your unique anatomy, giving you the smile you were always meant to have. From start to finish, every aspect of your treatment is customized just for you.

Take the Direct Flight

With KLOWen Custom Braces and our powerful software, your treatment is completely custom. It's like taking the most direct route, non-stop, to your new smile.

Custom Braces: Achieve your smile in less time

We understand your time is valuable and packed with things you love to do. Our custom braces give you greater control over your calendar, allowing you to focus on the things that matter most.

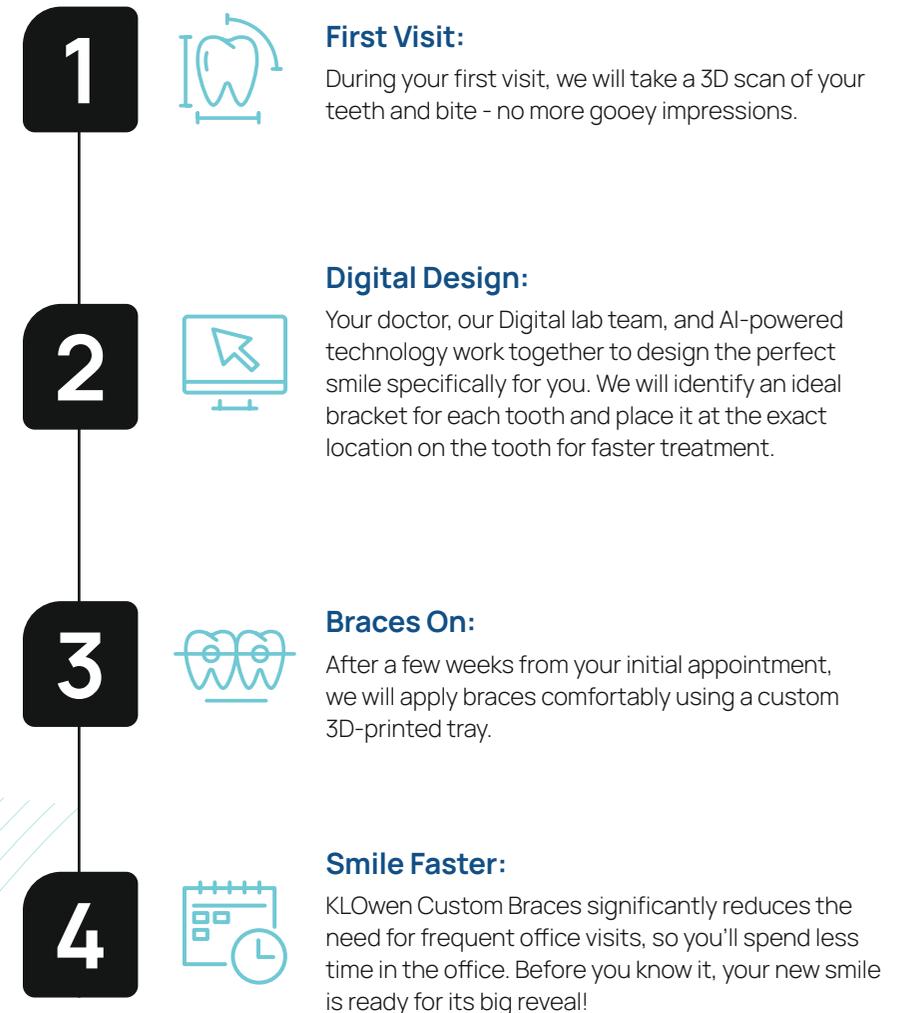

Unlike non-custom orthodontics, our personalized approach to treatment means fewer appointments for bracket repositioning and adjustments. You'll get the results you want, but in less time. We're here to help you achieve your goals while making the process as friendly and comforting as possible.

The KLOwen Difference

Why custom braces are a better fit for you.

| | KLOwen | Traditional Braces |
|--|--------|--------------------|
| Treated by orthodontist | ✓ | ✓ |
| Insurance accepted | ✓ | ✓ |
| 3D scanning, planning, & printing technology | ✓ | |
| Customized appliance | ✓ | |
| Fewer appointments | ✓ | |
| Shorter treatment time | ✓ | |
